RE: Robert Wolfe Construction Company

Building a new high school in Ascension Parish was no small task. In retrospect, it was enormous and much more involving than one could have anticipated. However, the quality and resourcefulness of a contractor does make all the difference in the world. Robert Wolfe Construction was the key to our project's success by having it completed on time and within budget, even when things appeared impossible.

Like a phoenix rises from the ashes the new Ascension Christian High School emerged as one of the most beautiful and innovative schools in the state. The project, valued at over 2.5 million dollars, included a 30-year-old cinder block building with a flat roof and a gymnasium both of which had to be completely renovated from the sewage to the roof and everything in between. With the quality and friendliness of the craftsmen and the resourcefulness and leadership of Mr. Robert Wolfe, Ascension Christian High School stands as a remarkable accomplishment and a testimony to the dedication and quality of work done by Robert Wolfe Construction.

You are invited to visit the campus of Ascension Christian High any time. For information, please call, 225-622-2800.

Sincerely,

Mark S. Pellegrin, Principal  
Ascension Christian High  
Gonzales, Louisiana
